THE CUP-VARIANTES

Cup variant V1

Very deep V-shaped cup.
This Cup variant is a further development of the well-known Hellerberg shape. The newly developed cup offers a very straight air flow and a voluminous orchestral sound. In combination with the Booster medium as well as Booster heavy, it's a very good all-round cup for large orchestras. Especially on B-tubas an excellent cup.
Bore: Ø8.60mm
Shank Variant: 74A

Cup variant V2

medium-flat pear-shaped cup.
Very lively and manoeuvrable cup. Excellent for wide-menstruated F-tubes. In combination with the Booster light as well as the Booster medium a very convincing combination for quintet and chamber music. Fast response and very good accuracy characterize the cup.
Bore: Ø7.60mm
Shank Variant: 74B

All Cup variants are available in sizes Ø31.50mm to Ø33.50mm with the letter defining the respective size:

72A: Ø31.50mm
72B: Ø32,00mm
72C: Ø32,00mm
72D: Ø32,50mm
72E: Ø33,50mm

The cup variants are available in gold or silver.

Cup variant V3

deep V-shaped cup. From the middle of the cup slightly pear-shaped.
A very balanced shell cut with a clear air flow and very good intonation. In combination with the Booster medium as well as Booster heavy a very nice shell and unreservedly recommended on all B-tubes. It offers a very direct response and is one of the most popular mouthpieces in the SAJA brassline mouthpiece series.
Bore: Ø8.60mm
Shank Variant: 74A

Cup variant V3-C

deep V-shaped cup. From the middle of the cup slightly pear-shaped.
A very balanced shell cut with a clean air flow and very good intonation. It offers a very direct response and is one of the most popular mouthpieces in the SAJA brassline mouthpiece series. This cup is based on the V3 variant, but with the bore Ø8.30mm.
In combination with the Booster light as well as Booster medium a nice kettle for F-tubes. It is an excellent orchestral as well as solo mouthpiece.
Bore: Ø8.30mm
Shank Variant: 74C

Cup variant V4

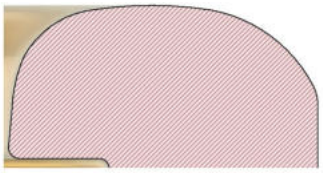

this cup is a reproduction of the legendary Volare Roger Bobo.
It's an excellent F-tuba solo and ensemble mouthpiece and in combination with the Booster light and Booster medium it's very multifaceted in terms of timbre. It draws very well and forms a full, round sound.
Bore: Ø7.60mm
Shank Variant: 74B

THE RIM VARIANTS

Rim variant V1

At this Rim, the highest point is relatively far inwards. The rest of the contact surface is flattened and pleasantly wide. It offers a good combination of endurance and response.
The Rim width is 7.80mm.

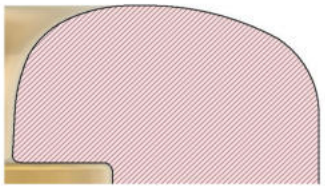

Rim variant V2

This Rim still offers a pleasant playing feeling with its small contact surface. Soft bindings and clean transitions characterize this Rim.
With an Rim-width of 8.10mm, it is very comfortable and offers maximum flexibility.

The Rim width is 8.10mm.

All Rim variants are available in sizes Ø31.50mm to Ø33.50mm, with the letter defining the respective size.

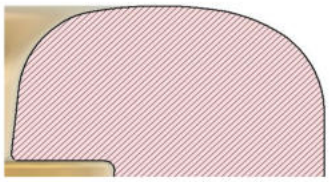

71A: Ø31.50mm
71B: Ø32.00mm
71C: Ø32,50mm
71D: Ø33,00mm
71E: Ø33,50mm

The Rim variants are available in gold or silver.
The cup and rim sizes are only compatible under the same letters!

Rim variant V3

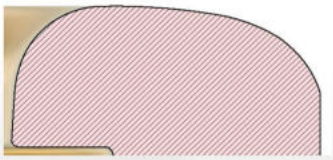

This Rimform is a combination of V1 and V2. It is very comfortable and is characterized by a very direct response.
The highest point is on the outside, with the transition being rounded.

The Rim width is 7.85mm

Rim variant V4

With its elongated contact surface, this Rim offers an ideal prerequisite for long play.
The inner edge is slightly sharp. The highest point is relatively far in.
The Rim width is 8.15mm

THE SHANK VARIANTS

The bore sizes are defined by the letters:
74A: Ø8.60 mm
74B: Ø7.60 mm
74C: Ø8.30 mm

The finish of the shank is available in gold or silver.

Shank Variant V1
This shank offers a slightly convex course

Shank Variant V2
This shank offers a straight course.

ShankVariant V3
This shank offers a slightly concave course.

DIE BOOSTER VARIANTS

Booster Variant light

weight 43g.

The Light, Medium, and Heavy boosters are compatible with all cups in the SAJA Brassline tuba mouthpiece series.

All boosters are available in gold, silver, or velvet gold and velvet platinum.

Booster Variant medium

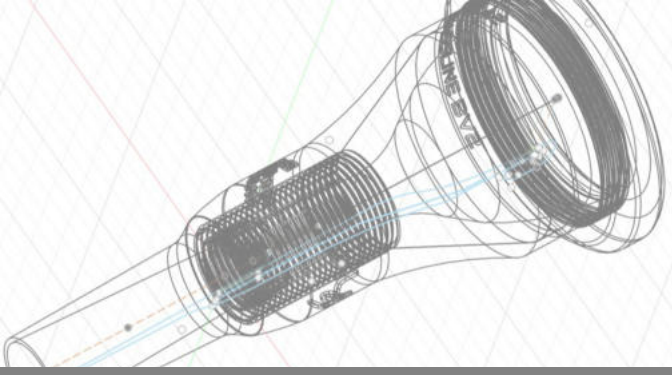

weight: 75g.

Booster Variant heavy

weight: 123g.
